**Subject:** Microsoft Settlement

Honorable Judge Colleen Kollar-Kotelly,

I am an IT Professional (Vice President of Product Development) at CacheFlow - an Internet infrastructure company not affiliated with Microsoft.

After reviewing the documents published by DOJ on the matter of the "Microsoft Settlement" as well as arguments pro and con from supporters/opponents, it is my belief that this settlement reaches a good balance of keeping Microsoft "in line" regarding their business practices without imposing undue restraint to hinder innovation from Microsoft or any other technology company. I also find the punitive measures sufficient and simple.

I hope you will find the settlement satisfactory and not give in to critics whose sole purpose is to keep the case unsettled and in some cases, extort financial or competitive gain from delaying the settlement.

Sincerely,

Murat Divringi  
Vice President of Product Development  
CacheFlow Inc.
